

Weekly Report Template

Date: 10/11/14

Project Name: Flow-Through Uroflow Device

Group Number: 32

Group Members: Jordan Nick, Jodi Small, Akhil Sundar

Current status of project:

We went through our 19 prototype ideas and fleshed out the ideas to create a better understanding of what they will entail. This included discussing detailed explanations of how they would be designed and how would they function.

Work planned for next week:

In order to consider which of our ideas we want to continue with, we will weigh the ideas against each other using a Pugh Chart. In a previous meeting we had already come up with the categories we want to consider on our Pugh Chart and the relative weight of each category.

Anything needed from client or TA or instructor to continue work:
